

JATIN KUMAR

Data Analyst (Fresher) • SQL • Python • Power BI • Advanced Excel

Palwal, Haryana, India | +91 90533 02020 | jating1416@gmail.com

Portfolio: jatinanalytics.co.in | LinkedIn: linkedin.com/in/jatin-kumar-5a46a720a | GitHub: github.com/jating1416-debug

PROFESSIONAL SUMMARY

Fresher Data Analyst with an 8-project analytics portfolio and hands-on expertise in SQL, Python, Power BI, DAX and Advanced Excel. Builds end-to-end analytics solutions — data cleaning, relational modelling, KPI development and interactive dashboards — with every project backed by a live dashboard and documented source code.

Since Feb 2026: completed an 89-hour certified Data Analyst Bootcamp and built a portfolio spanning supply chain, finance, retail, HR and banking analytics. Also brings 2 years of professional work experience (Registered Pharmacist, Max Healthcare) with strong discipline in records, accuracy and audit compliance.

Pursuing an online MBA in Operations Management — fully available for full-time work.

TECHNICAL SKILLS

SQL & Databases: MySQL; joins, aggregations, subqueries, CTEs, window functions

Python: Pandas, NumPy, data cleaning, transformation, groupby/aggregation, Jupyter Notebook

Power BI: Data modelling, DAX measures, CALCULATE context, time intelligence, interactive dashboards

Excel & Visualisation: Pivot Tables, XLOOKUP, SUMIFS, FILTER, UNIQUE, Power Query; Matplotlib, Seaborn, Plotly

Analytics: EDA, KPI definition, data quality assessment, statistical analysis, business reporting & storytelling

EDUCATION

MBA in Operations Management (Online)

Jan 2026 – Present

Vivekananda Global University

Bachelor of Computer Applications (BCA)

2022 – 2025

Sikkim Alpine University

Diploma in Pharmacy (D.Pharm)

2020 – 2022

Apeejay Stya University

SELECTED ANALYTICS PROJECTS

8 end-to-end projects — live dashboards, screenshots and source at jatinanalytics.co.in

Supply Chain & Logistics Delivery Performance Dashboard

Python • Power BI • DAX • Data Modelling

- Analysed 200,000 order shipments (customer, product, warehouse, carrier data) to evaluate fulfilment efficiency, delivery SLAs, shipping costs and profitability.
- Built KPI measures: Rs.3.95Bn revenue, Rs.518.09M net profit, 13.13% net margin, 86.19% on-time delivery, 4-day average delivery cycle.
- Found Air Freight as the costliest mode (Rs.266.99 avg cost/order, ~80% above Road Freight) and late-order / warehouse-return patterns — recommending freight-mode optimisation and carrier-level SLA tracking to lift on-time delivery.

Indian Financial Fraud Analytics Dashboard

Python • SQL/MySQL • Power BI • DAX

- Analysed 250,000 synthetic transactions linked to customer, card and merchant data to investigate payment, location and merchant-risk patterns.
- Built fraud-monitoring KPIs: 5.4% fraud rate, 91% transaction success rate; segmented exposure by state, payment channel, card status and merchant category.
- Highlighted expired-card transactions, late-night activity and high-exposure states/merchant categories — recommending expiry alerts and merchant-category monitoring for focused risk investigation.

E-Commerce Sales Analysis Dashboard

MySQL • Power BI • DAX • Advanced Excel

- End-to-end sales analytics: SQL window functions for category and regional ranking; KPIs — Total Sales, Profit, Orders, Margin, Average Order Value.
- Home Decor led sales and profit; South region recorded the lowest sales — recommending targeted promotions in the South to lift underperforming demand.

HR Analytics Dashboard

Python/Pandas • MySQL • Power BI

- Analysed 4,410 employees (3,699 active); overall attrition 16.12% across department, age, performance and job-satisfaction views.
- R&D = largest workforce and highest average salary; 26-35 age group = largest workforce segment — recommending retention focus on high-attrition departments and salary benchmarking.

Smoking Health Risk Analytics Dashboard (Educational)

Python • Pandas • Power BI • DAX • Data Modelling

- 30,000-row synthetic cohort: smoking status vs lifestyle, blood pressure, cholesterol and organ-wise risk indicators; controlled Never/Current/Former distributions. Illustrative, non-clinical.

Additional dashboards: Bank Analytics, Zomato Analytics, Virat Kohli Career Analytics — live dashboards and details at jatinanalytics.co.in.

CERTIFICATION

Complete Data Analyst Bootcamp - From Basics to Advanced

Completed Jul 2026

KRISHAI Technologies (Krish Naik, Jayant Topnani) via Udemy · 89 hours

Credential ID: UC-0424329d-4d67-4fb8-b596-33cc47844312

Verification: [ude.my/UC-0424329d-4d67-4fb8-b596-33cc47844312](https://udemy.com/UC-0424329d-4d67-4fb8-b596-33cc47844312)

PROFESSIONAL EXPERIENCE (BRIEF — PRIOR FIELD)

Registered Pharmacist (Non-IT)

Feb 2024 – Feb 2026

Max Healthcare (Max Hospital), Gurugram, Haryana

- Managed daily medicine inventory records (consumption, closing stock, reorder levels) in a regulated, audit-driven environment — keeping emergency stock available without stockouts.
- Reconciled ward/floor stock returns against system and physical records, and supported narcotics & IV-stock audits with complete, traceable documentation.

ADDITIONAL INFORMATION

- Domain strength: healthcare and pharmaceutical operations, dispensing records, statutory registers, ROL-based replenishment, audit documentation.
- Registered Pharmacist — Pharmacy Council registration.
- Languages: English, Hindi. Availability: open to relocation across Delhi NCR and remote roles.
- Available for full-time work — MBA is an online program.
